

PROJECT E-TRIDEM: EVALUATION

First survey at the beginning of the course

Welcome to e-tridem.net!

As you know e-tridem.net has been designed as a new learning and teaching arrangement. Several Educational institutes from four European countries have put into practice their innovative ideas to offer a course to practise two foreign languages at a time.

Please, notice that this is a student-centred course and the evaluation of your individual learning process is very important for us.

To begin with we would like you to tell us about your expectations and objectives. Why do you participate in e-tridem.net?

Please briefly answer the following questions.

1. What made you join this course?

2. e-tridem is about cooperative learning. What do you expect from your e-tridem partners?

3. e-tridem.net involves new media technology. Do you expect to improve your computer literacy? Do you think the use of ICT will help intercultural communication and / or language knowledge? If so, how? If not, why not?

4. Anything else?

Thank you very much for your cooperation!
